

NatureWest

Litter Clean Up Activities

Under the Banner of Wyndham Litter Warriors, NatureWest assists and promotes seven litter clean up groups around the Wyndham City Area. Since 2015 these groups have picked up over 15 tonnes of litter, which would otherwise have made its way to our major waterways and Port Phillip Bay, damaging the environment and harming our local fauna.

Working Bees are generally focused on an area with public access, such as parks or waterways. Volunteers are briefed on safety, and well equipped to carry out the task. At the end of the formal activities, groups normally meet for a social chat and BBQ sizzle.

If you are interested in joining NatureWest activities, please contact the President, Bruce Boddington on 9394 8385. Or join our Facebook group to keep up to date with our program. We welcome volunteers from all walks of life, and have a range of activities and duties to suit everyone interested in nature and protecting our environment.
