

DIGITAL WATER EDUCATION

To cater for the evolving needs of schools and universities, Melbourne Water's Education team has developed a suite of FREE digital education tools and resources to support the delivery of water education.

Melbourne Water's education programs for primary and secondary students focus on the urban water cycle. By exploring water as a resource and the biodiversity of our waterways, our aim is to enable young people to better understand water use issues and how to make positive change.

Digital Education Tools and Resources

Program	Year level	Estimated time to complete	Resource type
 Western Treatment Plant 'WTP Tour' app	3 – 12, Tafe/Uni	15 – 30 minutes	Augmented reality app
 Western Treatment Plant Virtual Tour	3 – 12, Tafe/Uni	1 – 2 hours	Virtual tour
 Virtual Excursions	3 – 10	45mins – 1 hour	Guided virtual excursions led by an educator
